1 Scope

The purpose of the document is to define the semantic model and syntactic form of the message for the electronic despatch advice and to enable efficient implementation and greater use of electronic commerce in the ordering process based on this form.

2 Normative references

The following documents are essential for the application of this standard, in whole or in part. For dated references, only the cited edition applies. For undated references, the latest edition of the publication (with amendments) applies.

- eSLOG 2.0 General instructions for electronic order, electronic order response and electronic despatch advice (hereinafter eSLOG 2.0 General instructions)

3 Terms and definitions

This document uses the terms and definitions given in the eSLOG 2.0 General Instructions document.

4 Delivery process

4.1 The business clients involved and their roles and relations

The eDeliveryNote is a message that allows partners in the chain to monitor and track all incoming deliveries and their content, easier inventory management, and faster handling of accepted goods.

Two business partners, the Customer and the Supplier, participate in the basic procurement process from the order to the delivery. Each partner can complete two or three requests in the process.

The delivery process includes functions / requests on the part of the Supplier, where the Seller has a commercial role, who after preparing the ordered goods / services checks whether the prepared goods correspond to the order response and prepares the despatch advice and sends it to the Buyer. The delivery then arranges the logistical process for the delivery of the ordered goods to the Customer.

Within the operational requests on the part of the Supplier, depending on the type of order, the preparation and delivery of the ordered goods to the Customer takes place:

- Preparation of the shipment from stock or from production in the form of transport units in accordance with the requirements of the Buyer.
- The delivery arranges the logistical process for the delivery of the ordered goods to the Customer.

On the Buyer's part, the commercial request is to check the suitability of the Despatch Advice with the Order or the received Order Response document. As part of the Customer's operational request of the Customer, the Receipt Unit prepares the take-over of the delivered goods / services on the basis of the received Despatch Advice.

4.2 Business process of the despatch advice

The basic goal of the despatch advice is that the Customer receives feedback on the delivery as soon as possible and thus information on the realization of their order. When the Supplier prepares the goods for shipment, they make an electronic despatch advice, which they send to the Buyer / Customer. The despatch advice must be at the Buyer's place of receipt of the goods before the delivery of the Buyer's goods. The despatch advice may also include the marking of the packaging and the structure of the packaging of the delivery, which enables the Buyer a significantly faster pick-up of the goods and further internal logistics and inventory management.

The despatch advice is therefore a message setting out the details of the goods sent under the conditions agreed between the Buyer and the Seller with the function of informing the recipient in detail about the contents of the shipment. There are several types of supplies:

- Ordinary deliveries (delivery to the distribution centre)
- Direct delivery to the store
- Crossdocking
- Transshipment
- Return shipments

5 Types of despatch advices

For despatch advices, the document type is marked with the code 351.

6 Semantic data model of the electronic despatch advice

The semantic model of an electronic despatch advice includes business terms and business rules.
